Gerrit Jepsen, CFA, New York (1) 212-438-2529; gerrit_jepsen@standardandpoors.com

Table Of Contents

Major Rating Factors

Rationale

Outlook

ITC Holdings Corp.

Major Rating Factors

Strengths:

- Steady cash flows from electric transmission subsidiaries International Transmission Co. and Michigan Electric Transmission Co.,
- Minimal competition from high regulatory and political barriers to entry,
- Low technological and operating risk, and
- Electric-transmission-only investments.

Weaknesses:

- Modest exposure to revenue volatility from electric load variability,
- Limited economic diversity,
- Ambitious capital spending plan, and
- Highly leveraged capital structure.

Corporate Credit Rating

BBB/Positive/-

Rationale

The ratings on ITC Holdings Corp. (Holdings) reflect the consolidated credit profile of it and its electric transmission subsidiaries, Michigan Electric Transmission Co. (METC) and International Transmission Co. (ITC Transmission).

As of March 31, 2007, Novi, Mich.-based Holdings had \$1.4 billion of consolidated debt.

ITC Transmission and METC benefit from being sole providers of electricity transmission service to Detroit Edison Co. (BBB/Stable/A-2), Consumers Energy Co. (BBB-/Stable/-), and numerous cooperatives and municipal utilities. Holdings announced in January 2007 that it will acquire for \$750 million the transmission assets of Interstate Power & Light Co. (IP&L), a subsidiary of Alliant Energy Corp. The inclusion of IP&L's transmission assets in Minnesota, Illinois, and largely Iowa should help further geographically diversify Holdings' revenues and cash flows and broaden its customer base. Moreover, there is minimal competitive risk because of high regulatory and political barriers to entry.

Prospectively, the added customer, economic, and geographic diversity provided by this acquisition further support Holdings' consolidated business risk profile. Holdings', METC's, and ITC Transmission's business risk profiles are scored '2' (excellent) and reflect very supportive regulation, minimal operating risk, and increasingly diversified markets and customers, offset by Holdings' aggressive growth and exposure to weather-related demand variability. (Business profiles are categorized from '1' (excellent) to '10' (vulnerable)).

Holdings' current cash flow measures are adequate for the rating. For the 12 months ended March 31, 2007, after adjustments, consolidated funds from operations (FFO) interest coverage was 2.8x, down from 3x at year-end 2006. FFO to total debt was 7% about the same as year-end 2006. Debt to total capital rose to 72% from 70.5% at year-end 2006. We expect leverage to remain around 70%, as indicated by Holdings, and cash flow measures to be inline for the rating.

The transmission subsidiaries will continue to require annual rate increases to recover capital expenditures that are projected to exceed \$1 billion through 2010. The company will not be able to internally finance these capital expenditures and will require external funding through equity or debt issuances. Given the company's currently high debt leverage of around 70%, proceeds from equity offerings would be considered more favorable for credit quality than increasing debt.

Liquidity

Although internally generated cash flow should grow, the company, after dividend payments, will require external funding for capital spending and the pending acquisition of IP&L's transmission assets. As of March 31, 2007, Holdings' liquidity consisted of \$31.3 million of cash and equivalents on hand and 30% availability under its \$125 million revolving credit facility. ITC Transmission and METC have access to \$80 million and \$35 million under a credit agreement that, respectively, had 59% and 100% availability as of March 31, 2007. Holdings has minimal refinancing risk with no significant debt maturities over the next several years.

Outlook

The positive outlook reflects our expectation of the maintenance of financial measures consistent with the rating through ongoing rate recovery of capital improvements. The ratings could be raised after a successful track record has been established now that METC has been integrated, the necessary regulatory approvals are received without major concessions for the acquisition of IP&L's transmission assets, and the FERC-authorized tariff for the new assets bolsters cash flow. The outlook could be revised to stable if the expected post-METC integration track record is not achieved, the FERC authorizes a rate tariff for transmission assets that does not provide the necessary cash flow support, or state regulatory commissions require large concessions for the acquisition to proceed and Holdings acquiesces.

Adjusted	1,274.5	129.0	128.1	92.7	43.9	61.4	90.6	167.1

*ITC Holdings Corp. reported amounts shown are taken from the company's financial statements but might include adjustments made by data providers or reclassifications made by Standard & Poor's analysts. Please note that two reported amounts (operating income before D&A and cash flow from operations) are used to derive more than one Standard & Poor's adjusted amount (operating income before D&A and EBITDA, and cash flow from operations and funds from operations, respectively). Consequently, the first section in some tables may feature duplicate descriptions and amounts.
